Installing from CD-ROM

For LINKS 386 CD

This installation program will first install the Recorded Player files and the Splash Screens and will then stop and ask if you wish to install the Course file (not including the flybys) to the hard drive. Since LINKS 386 CD can use the course file directly from the CD, it does not have to be copied to the hard drive. Courses played from the hard drive will render slightly faster than courses played from the CD. If you copy the course file to the hard drive, you can delete it later using the delete course feature in the game.

If you choose to leave it off the hard drive for now, you can copy it later by clicking the *Copy Course to Game Directory* button in the Catalog system. Refer to the LINKS 386 CD manual for more information.
